

Life Safety & Security Products

Fast Facts: Alarms & Detectors

Intertek offers product manufacturers a choice in safety certification: The ETL Listed Mark.

We hold accreditations through ANSI, OSHA, SCC, the California State Fire Marshal, and other bodies around the world to test and certify products.

We test and certify products to applicable UL, ULC and ANSI standards, such as UL 217, UL 268, UL 2034, and UL 1484.

Alarms & Detectors

Intertek has expanded its service capabilities to better serve clients in the Life Safety & Security industry. Alarms and detectors (smoke/CO/gas) both require certification to applicable standards. We provide the expertise and the accreditations to complete your testing and certification quickly and efficiently.

For years, manufacturers had only one choice in their selection of a safety certification mark. Today, however, Intertek offers the ETL Listed Mark with shorter queue times and more responsive service. We have multiple smoke boxes and CO chambers to ensure shorter project queue times, and recently completed the addition of a new fire room for testing to UL and ULC standards.

Intertek tests to prescribed ANSI, UL and SCC standards, including:

- UL 217 Single and multiple Station Alarms
- UL 2034 Single and Multiple Station CO Alarms
- UL 1484 Residential Gas Detectors
- UL 268 Fire Alarm Signaling Systems
- ULC S-531 Smoke Alarms

Why Intertek?

Intertek offers choice, and choice in any market means better service. With our fast turnaround times, responsiveness, network of laboratories and testing and certification expertise, we can provide solutions for all of your regulatory needs.

You have innovative, life-saving technology that needs to be in the hands of those who can use it. Intertek helps you get products to market faster.
