

Life Safety & Security Products

Fast Facts: Fire/Burglar Signaling Devices

Intertek offers product manufacturers a choice in safety certification: The ETL Listed Mark.

We hold accreditations through ANSI, OSHA, SCC, the California State Fire Marshal, MEA of New York and other bodies around the world to test and certify products.

We test and certify products to applicable UL, ULC, ANSI, and SIA standards, such as UL 464, UL 864 9th Edition, UL 985, and many more.

Fire/Burglar Signaling Device Testing and Certification

Intertek has recently expanded its Life Safety and Security products testing and certification services to include a more comprehensive range of commercial and residential Fire and Burglar Control panels, alarms and detection products. This offers manufacturers a safety certification alternative in the ETL Listed Mark that can drastically reduce your time to market.

In North America, we hold accreditations from OSHA, the California State Fire Marshal (CSFM) and the SCC. We currently have capability to test to nearly 40 standards, and we continue to add new capabilities to better serve our clients. Standards we test to include:

- ANSI/UL 985 Household Fire Warning System Units
- ANSI/UL 1023 Household Burglar-Alarm System Units
- UL 864 9th Edition Control Units and Accessories for Fire Alarm Systems
- UL 464 Audible Signal Appliances
- UL 1971 Standard for Safety Signaling Devices for the Hearing Impaired

In addition to full compliance testing, Intertek also offers a preliminary construction design review service to help identify construction and documentation deficiencies prior to final certification submission. This can eliminate additional costs and time delays, which leads to product launch delays and ultimately lost revenue.

Why Intertek?

Intertek offers choice, and choice in any market means better service. With our fast turnaround times, responsiveness, network of laboratories and testing and certification expertise, we can provide solutions for all of your regulatory needs.

You have innovative, life-saving technology that needs to be in the hands of those who can use it. Intertek helps you get products to market faster.
