

# uplink<sup>®</sup> 5200

## UNIVERSAL BROADBAND COMMUNICATOR

The Uplink 5200 communicator expands the capability of a dial-up alarm system to transmit signals over the internet. It is the cost-effective solution where there is broadband internet service but no analog telephone line to connect to the alarm system. The 5200 can be used for retrofits on existing systems, takeovers and new installations.

The 5200 converts the dialer output of an alarm system to an IP signal that can be transmitted securely over the internet to an Uplink server. A connection is then made to the central station to deliver the alarm signal. The 5200 supports two-way voice sessions as well as remote programming and touchtone remote control.

### Uplink Advantages

Secure dealer website for activation, configuration, and management

Flat-rate billing with no overage charges

Programmable periodic test intervals

Works with virtually any central station

Live technical and activation support\*

### Uplink 5200 Device Features:

- ✓ Easy to install; uses transformer (provided) or other 12V source.
- ✓ The 5200 communicator is hardwired between alarm dialer and internet service.
- ✓ Includes RJ11 dialer cable and Cat5 ethernet cable.
- ✓ Most installations use default settings.
- ✓ Uses phone number and account number from dealer website for easier takeovers.

A SIERRA WIRELESS<sup>®</sup> SOLUTION

# 5200 Universal Broadband Communicator

## A Trusted Partner

Uplink, A Sierra Wireless Solution, is the security industry's most trusted source for wireless alarm communicators.

Uplink delivers the unique combination of technology, quality, options, and superior value that have made us the industry's trusted source for security solutions since 1996.

With hundreds of thousands of installed devices throughout the United States, Mexico, and Canada, Uplink has the experience and expertise to provide reliable, award winning products with first class support.

For more information, visit the Uplink website at [uplink.com](http://uplink.com).

## Technical Specifications

INTERFACES	
Alarm System	Contact ID only, RJ11 cable provided
Internet	RJ45, cable provided Connects to router with Dynamic IP addressing (DHCP) configurable for static IP address environments.
CENTRAL STATION COMMUNICATIONS	
Digital	To a dial-up or internet receiver
Two Way Voice	Dial up only
POWER REQUIREMENTS	
Power	12V DC from transformer or panel (270 mA)
Universal Power Supply	12V DC, 0.5A, UL listed transformer (included)
STATUS REPORTING	
	LED's for power, internet (WAN), panel (phone 1) central station notification of internet outages
REMOTE PANEL PROGRAMMING	
	Supports upload/download of most panels over dial-up
DIMENSIONS	
	4.5 x 3 1 inch
DEALER WEBSITE	
	Enter phone number and account number in dealer website for easier takeovers. Activate & deactivate unites Adjust setting and reporting View signal history
