With IFTTT**

Uplink Remote Smart Phone App for the Connected Home

Build in additional value and flexibility for your customers with Uplink Remote Advanced using IFTTT* while increasing revenue for your business.

Uplink Remote gives users the freedom to control the alarm system remotely and receive important alerts and information. Now, using IFTTT compatibility, this capability can be expanded even further, allowing control over any connected device in the home or business using more than 40 predefined Uplink Remote Applets and user's custom Applets.

Uplink Remote Advantages

- Uses IFTTT compatibility to create a smart home or business environment where connected devices can be controlled remotely
- Remotely arm and disarm the alarm system
- View alarm event history and receive event notification messages
- Add, manage, and delete users
- Adjust settings for event notifications
- Access live video footage of your home or business
- With IFTTT access more than 40 predefined Uplink Remote Applets
- IFTTT is agnostic and universal and does not require a particular alarm panel.

IFTTT COMPATIBILITY WITH THE SMART HOME

 <p>ALARM PANEL</p>	 <p>VIRTUAL ASSISTANT</p>	 <p>VIDEO</p>
 <p>LIGHTS</p>	 <p>THERMOSTAT</p>	 <p>PLUS MANY MORE</p>

*IFTTT capabilities require Uplink Remote Advanced
