WARRANTY & LIMITATION OF LIABILITY

Standard 12-Month Limited Warranty

THE FOREGOING WARRANTY APPLIES ONLY WITH RESPECT TO AUTHORIZED UPLINK DEALERS OR OTHER AUTHORIZED UPLINK RESELLER PURCHASING AN UPLINK 5500 OR OTHER UPLINK DEVICE DIRECTLY FROM UPLINK. UPLINK DEVICES PURCHASED FROM AN UPLINK DISTRIBUTOR OR OTHER THIRD-PARTY RESELLER ARE NOT WARRANTED TO THE PURCHASER BY UPLINK AND ARE COVERED SOLELY AND EXCLUSIVELY BY SUCH WARRANTY AS MAY BE SEPARATELY OFFERED BY THE DISTRIBUTOR OR RESELLER.

Except as otherwise agreed by Uplink in writing, Uplink warrants to authorized Uplink distributors or other authorized resellers who purchase Uplink Devices directly from Uplink that for 12 months following the date of purchase, said Uplink Devices will be free of defects in materials and workmanship when installed, operated, maintained, and serviced in strict accordance with Uplink’s requirements. If an Uplink Device covered by the foregoing warranty fails because of a defect in materials or workmanship within the 12-month warranty period, Uplink will, at its sole option and at no charge, repair or replace it or arrange for its repair or replacement. Uplink’s agreement to repair (using new or reconditioned parts) or replace (with an equivalent new or reconditioned device) an Uplink Device found by Uplink to be defective in materials or workmanship is the distributor’s/ reseller’s exclusive remedy; this remedy will not be deemed to have failed of its essential purpose so long as Uplink is willing and able to repair or replace a defective Uplink Device as provided above or, at its sole option, to refund the purchase price paid. Any returns must be made in accordance with Uplink’s then-current RMA process. Uplink Devices that have been repaired or replaced hereunder are warranted only for the remainder of the term of the original warranty. THE FOREGOING WARRANTY IS LIMITED AND IS THE ONLY WARRANTY OFFERED. IT IS NON-TRANSFERRABLE. UPLINK MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, INTEROPERABILITY WITH THIRD PARTY SERVICES, SYSTEMS, AND FACILITIES, AND NON-OBSOLESCENCE. THE WARRANTY SET FORTH FURTHERMORE DOES NOT COVER UPLINK DEVICES THAT (A) HAVE BEEN IMPROPERLY INSTALLED, OPERATED, OR SERVICED; (B) HAVE BEEN TAMPERED WITH; OR (C) HAVE BEEN SUBJECTED TO ENVIRONMENTAL EXTREMES.

Limitation of Liability

NEITHER UPLINK NOR ITS THIRD PART SERVICE PROVIDERS SHALL BE LIABLE TO ANY UPLINK DISTRIBUTOR OR RESELLER, ANY INSTALLER, ANY END USER OF AN UPLINK DEVICE OR UPLINK SERVICE, OR ANY OTHER THIRD PARTY FOR ANY CONSEQUENTIAL, INCIDENTAL, INDIRECT, EXEMPLARY, PUNITIVE, OR SPECIAL DAMAGES INCLUDING, WITHOUT LIMITATION, LOST DATA, SALES, REVENUES, OR PROFITS, REGARDLESS OF
THE FORESEEABILITY OF SUCH DAMAGES. NEITHER UPLINK NOR ITS SERVICE PROVIDERS SHALL BE LIABLE FOR ANY CLAIM RESULTING FROM OR RELATING TO (A) THIRD PARTY CRIMINAL ACTIVITY OR FRAUD; (B) ACTS OR OMISSIONS OF UPLINK DISTRIBUTORS AND RESELLERS, END USERS OF UPLINK DEVICES OR UPLINK SERVICES, OR OTHER THIRD PARTIES; OR, (C) EXCEPT AS OTHERWISE MANDATED BY APPLICABLE LAW, BREACHES OF PRIVACY OR DATA SECURITY TRACEABLE TO THIRD PARTIES. NEITHER UPLINK NOR ITS SERVICE PROVIDERS SHALL BE LIABLE FOR ANY CLAIM RESULTING FROM THE FAILURE OF AN UPLINK DEVICE, UPLINK SERVICE, THIRD PARTY EQUIPMENT OR SERVICE, OR ANY END USE THEREOF INCLUDING, WITHOUT LIMITATION, A HEALTH, MEDICAL, ALARM, SAFETY, OR SECURITY APPLICATION, EVEN IF THE CLAIM IS ATTRIBUTABLE IN WHOLE OR IN PART TO AN ACT OR OMISSION OR OTHER FAULT ON THE PART OF UPLINK OR ITS SERVICE PROVIDER. IN NO EVENT SHALL UPLINK’S AND ITS SERVICE PROVIDER’S TOTAL, CUMULATIVE LIABILITY FOR ANY ONE OR MORE RELATED OR UNRELATED CLAIMS EXCEED AN AMOUNT EQUAL TO THE AGGREGATE AMOUNT PAID BY THE CLAIMANT FOR UPLINK SERVICE DURING THE 12 MONTH PERIOD PRECEDING THE DATE OF THE EARLIEST EVENT GIVING RISE TO THE SUBJECT CLAIM(S).

TECHNICAL SUPPORT

Technical Support is available Monday through Friday, 8:00 AM to 8:00 PM EST excluding holidays. Before calling or emailing Technical Support please ensure you have read the entire installation guide.

To be able to help you, Technical Support will need you to provide:

Login name    Password    Serial number of the unit

DESCRIPTION

The Uplink 5500 is an “always on,” multi-purpose, FCC-certified device capable of sending and receiving alarm signals or other data over the LTE Cellular Network. When connected to an alarm system, the 5500 will send alarm signals over the cellular network to Uplink’s alarm processing center, that will forward the signals to the appropriate monitoring station and/or selected email addresses.

The 5500 can be connected to an alarm system using up to four inputs on the 5500. Each of these inputs can be set up to send a selected signal to the monitoring station. Contact ID, SIA, Modem Ille/Illa- and 4/2 (:20 PPS) formats are supported.

The 5500 also has two configurable relay outputs to send signals to alarm panels or control other devices.
INSTALLATION STEPS

Before beginning installation: If you are not yet an Uplink dealer, register by visiting www.uplink.com and click on the new dealer account tab.

Step 1. Activate the system. The Uplink 5500 operates “out of the box” with most commercial panels. No additional programming or equipment is required. To activate with default functions, go to www.uplink.com, or use the Uplink Installer App, or call (888) 987-5465. Consult the Quick Installation Guide included with the 5500.

Step 2. Install the antenna on the top of the unit.

Step 3. Position the unit for maximum signal strength. Connect the unit to a 12V DC, 500mA power supply. Be sure the area is dry and free from interference of metal objects and obstructions.

Step 4. Determine network availability and signal strength.
   a) Signal strength should be one blink minimum. Relocate the unit or install a high-gain antenna if necessary.

Step 5. Disconnect the unit from the power supply before wiring. The standard configuration for the Uplink 5500 is to leave DIP switches S3 and S4 set to “OFF” (Input 1 triggered by 9V DC to 12V DC or an open collector). For detailed wiring instructions and alternative configurations, see UNIT WIRING on pages 8 and 9.

**CAUTION:** Do not connect the unit to a receptacle controlled by a switch.

**CAUTION:** Improper connections at the power connector may result in damage to the unit.

Step 6. Configure the unit. Set the DIP switches on the front panel of the unit according to the following table:

**TABLE 2: DIP SWITCH SETTINGS**
INSTALLATION STEPS (cont.)

Step 7. When you have finished wiring and configuring the unit, re-apply power to the unit and wait at least two minutes then test the connection to the central station by creating an alarm from the panel.

NOTE: The DIP switches are only read immediately after the unit is powered up. Always cycle the unit’s power after making changes to the DIP switch settings.
UNIT WIRING

Inputs

Input 1 (Selectable Via DIP Switches)

A. Standard Input - (DIP switches S1 OFF, S2 OFF) This mode configures the unit to be tripped from a DC voltage ranging from 9 V DC to 12 V DC or an open collector.

B. Pulse Counter - This mode configures the unit to count 12-volt pulses. This is not intended for rapid repetitive pulses.

C. Timed Bell - (DIP switches S1 ON, S2 OFF) This mode configures the unit to be tripped from a DC voltage ranging from 9 V DC to 12 V DC. The unit reads a pulsed voltage as a fire signal and a steady voltage as a burglary signal. It may be necessary to place a 1K Ohm resistor in parallel to prevent false alarms when using panels with supervisory voltage on the bell circuit. Some panels with supervised bell circuits may require a 1K Ohm resistor in the circuit. Contact Technical Support for further details.

D. Sampled Siren* - (DIP switches S1 ON, S2 ON) This mode configures the unit to be tripped from a siren driver or a panel with a built-in siren driver. The unit reads a steady tone as a fire signal and a yelping tone as a burglary signal.

*NOTE: The input assumes that a speaker is connected to the panel. If you are not using a speaker we recommend using a Timed Bell instead of Sample Siren. This is an option on most panels.

Input 4

Neg Pulse RESET - (DIP switch S3 ON) A trigger of INPUT 4 from high-to-low and back-to-high causes the 5500 to reset. The high-to-low-to-high must be held for at-least 100 ms.

*Inputs 2, 3, and 4 (and Input 1 if Standard Type)
UNIT WIRING (cont.)

Voltage Trip

Inputs 2, 3, and 4 (and 1 if set for standard input) can be tripped by applying 12 V to the + input and 0 V to the - input. A signal must be continuously present for 500 ms.

![Diagram of Voltage Trip Wiring Example](image)

**FIGURE 4: WIRING EXAMPLE FOR VOLTAGE TRIP**

Open Collector

Inputs 2, 3 and 4 (and 1 if set for standard input) can be tripped by applying 12 V to the + input and the Open Collector output of the panel to the - input. A signal must be continuously present for 500 ms.

![Diagram of Open Collector Wiring Example](image)

**FIGURE 5: WIRING EXAMPLE FOR OPEN COLLECTOR TRIP**

Outputs

Outputs can be used to signal communication trouble to the alarm panel or can be used to control other devices at the installation site. Outputs 1 and 2 are dry contact relays rated for a maximum of 100 mA at 24 V DC and are in the normally closed condition (selectable to NO).

Output 1

A. **Controllable Output via Website** - (DIP Switch S4 OFF) This mode configures the unit to accept commands over the air (OTA) to open or close the relay.

B. **Normally Closed Trouble Output** - (DIP Switch S4 ON) This mode configures the unit to keep the relay closed. The duration is a configurable setting OTA.
UNIT WIRING (cont.)

Output 2

Available for OTA commands unless you plan on using Uplink Remote. If you plan on using Uplink Remote, this output is used for the Key Switch Zone (arming and disarming the panel).

Power

Power Supply - The customer-supplied 12 V DC power supply/battery charger should be capable of supplying 500 mA peak for brief high current demands of the radio during transmission.

ANTENNA SPECIFICATION

The following types of antennas should be used with this unit:

Antenna type: External Dual Band ¼ wave antenna (included with unit) Maximum Antenna Gain: 3.0 dBi

Antenna connector: SMA

Antenna type: External Dual Band ¼ wave antenna Magnet mount (available separately)

Maximum Antenna Gain: 3.5 dBi Antenna connector: SMA

Cable length and loss: 3 meter, RG-174, total loss 2.8 dB
FCC & INDUSTRY CANADA REGULATORY COMPLIANCE

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference; and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy. If not installed and used in accordance with the instructions, it can cause harmful interference to radio communications. Interference may occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from the one to which the receiver is connected.
- Consult the dealer or an experienced technician for help.
FCC RF EXPOSURE INFORMATION

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this unit complies with the FCC guidelines and these international standards. For more information about RF exposure, please visit the FCC website at www.fcc.gov. THE TERM “IC:” BEFORE THE CERTIFICATION/REGISTRATION NUMBER ONLY SIGNIFIES THAT THE INDUSTRY CANADA TECHNICAL SPECIFICATIONS WERE MET.

THE EXTERNAL ANTENNAS USED FOR THIS UNIT MUST PROVIDE A SEPARATION DISTANCE OF AT LEAST 20 CM FROM ALL PERSONS AND MUST NOT BE CO-LOCATED OR OPERATED IN CONJUNCTION WITH ANY OTHER ANTENNA OR TRANSMITTER.
