The Uplink® 4530EX is a true 4G (HSPA+) alarm communicator that features both Dial-Capture for full-event reporting and Siren/Bell Sampling for summary-event reporting. The combination of these features in a single communicator makes the 4530EX universally compatible with almost every alarm system and central station. Compatible with 2G, 3G and 4G cellular networks, the Uplink 4530EX communicates to central stations by dialup to any industry standard receiver, or over the internet to an IP receiver—all with the exceptional service and features you’ve come to expect from Uplink, the leading supplier of alarm communications.

### KEY FEATURES:
- **Primary 4G Cellular communications, full alarm or summary event reporting**
- **Power from the panel or separate 12V DC power supply**

A TRUSTED PARTNER

The Uplink 4530EX is a new member of the Uplink family of alarm communicators. Our products deliver the unique combination of technology, quality, options and superior value that has made Uplink the security industry’s most trusted source for alarm communicators since 1996. Uplink options include 4G, 2G, CDMA or broadband communicators, primary or backup units, signaling only or Uplink Remote services, one year warranty or optional Lifetime Guarantee, summary or full event reporting, service in the U.S. or Canada, and different power choices to fit the needs of each installation. With hundreds of thousands of installed communicators throughout the United States and Canada, Uplink has the experience and expertise to provide the most reliable products and the finest support.

Plus, Uplink wireless communicators are backed by the unique combination of the proprietary ISO-27001 certified network service offering and an advanced dealer web management tool.
